A new strong container- and special-size plastic pallet

Cabka-IPS grows its family of strong container pallets with the Endur S7 and C7.2

Cabka-IPS, the supplier of sustainable plastic pallets and boxes is adding the Endur S7 and C7.2 to its product range.

The pallets are characterized by their square size, a robust design, their impact resistance, and their load capacity of 1,250 kg on high racks. Both are used, for example, to store FIBCs, flexible intermediate bulk containers, also called big bags, in high-bay warehouses. The difference between the two pallets is their size. While the C7.2, with container dimensions of 1,140 * 1,140 mm, was developed for transport in ISO containers, the S7 is available in the special dimensions of 1,200 * 1,200 mm – allowing you space for six module units (600 * 400 millimeters) per location. This means that the S7 can hold 20 percent more goods than an industrial pallet – or 50 percent more goods than a Euro pallet. This saves a great deal of space, which also makes it much cheaper to transport goods. It also offers sufficient surface area for transporting 200 litre kegs.

Besides the 3 runners version, the pallet is available with 6 runners and can therefore be used for block stacking. The pallet comes with
